IllumiSign™ Solar LED Sign & Billboard Lighting

The better, brighter floodlight

UNIFORM LED BRILLIANCE

Sol's remarkable LED floodlight technology provides ultra-brite, uniform brilliance and coverage.

NO POWER? NO PROBLEM.

Sol, the world leader in solar outdoor lighting for 20 years, offers the incredible flexibility of solar powered LED lighting for signs and billboards. The IllumiSign™ floodlight can be installed quickly and easily with no trenching, meters or utility costs. Sol's IllumiSign™ solar systems are plug-and-play, with no additional wiring required.

ENERGY EFFICIENT AND SUSTAINABLE

As a conventional lighting system, IllumiSign™ uses as little as 10% of the electricity of standard lighting, providing significant operational savings. Plus, Sol's environmentally friendly solar option eliminates electricity costs and reduces your carbon footprint.

MAINTENANCE FREE

Compared with standard lighting, the savings on maintenance alone can pay for the Sol IllumiSign™ floodlight—no bulbs to change for over 100,000 hours of use.

BUILT TO ENDURE

The IllumiSign™ floodlight is made with a rugged aluminum housing and exceeds industry standards. It provides a service life of 100,000 hours, which is at least 15 years of brilliant illumination. Best of all, thanks to proven reliability the IllumiSign™ floodlight carries an industry leading 5-year warranty.
